

Make Sustainability Work for Your Business

The National Environment Agency (NEA) has introduced the **Mandatory Packaging Reporting (MPR)**, in a bid to transform Singapore into a Zero Waste Nation. This requires companies to submit their packaging data and 3R plans annually, with the first report due by March 2022.

We think this is a great opportunity for us to review your sustainability plans and make it work for your business. Let's do better than just reporting.

Here's how we can help

- **Packaging Diagnosis** (in-depth study of current packaging use, data analysis etc.)
- **Packaging & 3R Strategy Formulation** (improvement recommendations, viable 3R plans, sustainability roadmap, etc.)
- **Implementation Roadmap** (% reduction of plastic material, sourcing of sustainable materials, etc.)
- **Identify Potential Cost-Savings** (supply chain optimisation, reduced materials, etc.)

Why TRIA?

TRIA is an award-winning packaging house. Our team consist of thought leaders in sustainability, with expertise in material science, end-of-life recycling, packaging innovation, lifecycle analysis and public sustainability policies. Despite the complexities around sustainability, we are committed to find solutions for our clients,

Edwin Seah

Advisor for Sustainability, TRIA

- Former Head of Sustainability for Food Industry Asia (FIA), advising global FMCG brands such as Nestle, Coca-Cola, PepsiCo and McDonald's on their sustainability strategy, roadmaps and policies.
